

European Battery Business Club [EBBC] Training Platform:

Batteries are the energy storage devices of the future! To meet the enormous demand for batteries, production capacities will be established all over the world in the next decade. This will require thousands of skilled workers along the entire battery value chain - a process that will require extensive retraining and upskilling of existing staff and personnel.

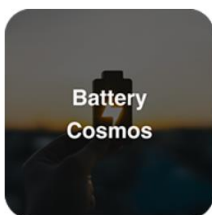

The European Battery Business Club (EBBC) is a unique lifelong learning program on battery technology that combines cutting-edge knowledge with industry insights delivered through innovative micro learning elements. Additionally, you will be provided with networking possibilities. The EBBC is based on the latest research findings concerning the most cutting-edge technologies, and how this drives the battery industry. The latest findings from research and current developments are provided by Various Fraunhofer Institutes and partners.

Learning Content:

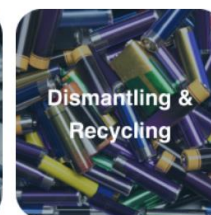

The EBBC training program is designed to deepen your understanding of various aspects of battery technology and its market with 1 year access to all the learning content on our learning platform. Learn whenever and wherever you want!

- The participants will start with two introductory modules: 'Battery Cosmos' and 'Battery Data'.
- After that, three training tracks focus on areas along the battery value chain: 'Battery Materials', 'Cell Manufacturing' and 'Battery Dismantling and Recycling'.

INTRODUCTORY MODULES

CONTENT TRACKS

DIPLOMA

Fraunhofer Certificate:

The online course finishes with a final test. This test is conducted by the independent examination centre of the Fraunhofer Personnel Certification Authority. The German Accreditation Body (DAKkS) confirms the competence of the Fraunhofer Personnel Certification Centre to certify training participants in accordance with DIN EN ISO/IEC 17024. If participants successfully pass the final test, they receive an official Fraunhofer certificate. The certificate attests to the participants' proven expertise and relevant, innovative practical knowledge in the field of battery storage.

Battery Community:

The EBBC offers the battery community a platform to network and exchange ideas. Interact and engage with other battery enthusiast, expert and learners!
